MICROBIOLOGY

Volume 52, Number 1-6, 1983

(A translation of Mikrobiologiya)

Volume 52, Number 1 January-February, 1983

Engl./Russ.

Isolation of Pure *Thiospira* Cultures and Investigation of Their Sulfur Metabolism — G. A. Dubinina and M. Yu. Grabovich . . . . . 1 5

Decarboxylase Activity and Biosynthetic Processes in *Saccharomyces carlsbergensis* on Action of Light — L. N. Chebotarev, G. V. Shaburova, and G. M. Lisyuk . . . . . 8 13

Investigation of the Interrelationship between Cyanide-Resistant Respiration, Efficiency, and Rate of Growth of *Candida valida* on Ethanol — V. K. Akimenko and T. I. Chistyakova. . . . . 11 17

Transformation of p-Nitrochlorobenzene by *Escherichia coli* — P. I. Gvozdyak, N. F. Mogilevich, and A. B. Tashirev . . . . . 15 22

Thermal Sensitivity of Naphthalene Biodegradation Plasmids — V. V. Kochetkov and A. M. Boronin . . . . . 20 27

Characteristics of the Autoregulatory Factor $d_2$, Causing Autolysis of *Pseudomonas carboxydoflava* and *Bacillus cereus* — V. A. Svetlichnyi, G. I. El'-Registan, A. K. Romanova, and V. I. Duda . . . . . 25 33

Regulation of Endo-1,4-β-glucanase, Exo-1,4-β-glucosidase and Cellobiase Biosynthesis in *Aspergillus terreus* — O. N. Okunev, I. D. Svistova, N. A. Zherebtsov, and E. L. Golovlev . . . . . 31 39

Activity of Intracellular Enzymes in Prospores and Sporangia of *Bacillus thuringiensis* — O. A. Krainova, N. I. Kosareva, and V. V. Shevtsov . . . . . 37 46

A Comparative Study of the Spectra and Activity of Enzyme Isozymes in a Haploid and an Autodiploid Strain of *Pichia pinus* — V. S. Orlova, A. P. Knyazeva, N. M. Semikhatova, and L. K. Starosel'tseva . . . . . 40 50

Synthesis of Total Lipids and Waxes by the Yeast *Candida tropicalis* at Various Concentrations of the Carbon Source — M. V. Zalashko, V. D. Andreevskaya, and I. F. Koroleva . . . . . 44 54

Composition of the Fatty Acids of *Promicromonospora citrea* — L. V. Andreev, L. I. Evtushenko, and N. S. Agre . . . . . 47 58

Transport and Accumulation of Biotin by Cells of Different Strains of Fungi and Yeasts — E. S. Naumova and L. I. Vorob'eva . . . . . 53 64

The Toxic Action of Cysteine on *Saccharomyces cerevisiae* Cells Growing on Media of Various Compositions — B. É. Damberg and Ya. É. Blumberg . . . 56 68

Synergism of Antivitamin Factors of Pantothenic Acid and Biotin in the Suppression of Yeast Growth — N. D. Smashevskii . . . . . 61 73

Selection of Fungal Cultures for Solid-Phase Fermentation of Sawdust and Straw — E. L. Golovlev, D. N. Chermenskii, O. N. Okunev, T. P. Brustavetskaya, L. A. Golovleva, and G. K. Skryabin . . . . . 65 78

Selection of Producers of Proteolytic Enzymes in Actinomycetes — D. A. Dolidze, D. T. Pataraya, Ts. S. Turmanidze, and G. I. Kvesitadze . . . . . 69 83

Use of Rifampicin for Directed Modification of the Nucleotide Composition of Cells of *Bacillus megaterium* and *Candida utilis* — I. L. Rabotnova, E. M. Shul'govskaya, I. N. Pozmogova, L. E. Kuznetsov, S. I. Ibragimova, and V. A. Ryabchuk . . . . . 72 87

The Role of Emulsification in the Process of Hydrocarbon Absorption by Cells of *Pseudomonas aeruginosa* — T. V. Koronelli, T. I. Komarova, and A. V. Iznatchenko . . . . . 78 94

Determination of the Taxonomic Status of *Photobacterium belozerskii* — G. A. Primakova, T. P. Turova, V. V. Zavoruev, and T. I. Vorob'eva . . . 82 98

New Species of *Micromonospora* — L. P. Ivanitskaya, É. M. Singal, and M. V. Bibikova . . . . . 85 102

Modification of Cell Ultrastructure in *Bacillus polymyxa* during Spore Formation — G. N. Ermakova, M. V. Nefelova, and N. S. Egorov . . . . . 91 109
Electron Microscopy of Microorganisms from Forest Lakes of Karelia — N. A. Lapteva . . . . . 96 114
Efficiency of UV Induction of Lysogenic Strains of Lactic Acid *Streptococci* depending on Cell Wall Thickness — A. S. Tikhonenko, I. A. Bespalova, L. P. Martynkina, and I. M. Kochkina . . . . . 100 119
Changes in the Cell Wall Composition during Cytodifferentiation of *Absidia coerulea* Related to the Formation of Dormant Structures — I. V. Pisarevskaya, E. P. Feofilova, and I. V. Marchenko . 104 124
Structural and Biochemical Characteristics of Cells of *Escherichia coli* with Differing Rates of Synthesis of Secreted Alkaline Phosphatase — N. I. Mikhaleva, S. A. Gulevskaya, M. A. Nesmeyanova, and B. A. Fikhte . . . . . 110 131
Effect of Low-Temperature Shock and Extracellular Ice Formation on the Outer and Cytoplasmic Membranes in *Escherichia coli* Cells — E. O. Puchkov, I. G. Govorunov, Yu. V. Evtodienko, and N. V. Kosarev . . . . . 116 136
Use of the Method of Concentrating Microorganisms in an Electric Field in the Search for Life on Mars — A. A. Imshenetskii, B. G. Murzakov, and I. K. Dorofeeva . . . . . 119 140
Population Dynamics of Microbial Antagonists in Nonsterile Soil — L. M. Polyanskaya, P. A. Kozhevin, and D. G. Zvyagintsev . . . . . 123 145
Activity of Activated Sludge Microorganisms as a Function of Wastewater Mercury Concentration — A. N. Ilyaletdinov, A. Mendeshev, A. B. Manasbaeva, O. V. Banovska, V. A. Belyakova, and I. M. Antonova . . . . . 126 149

**Volume 52, Number 2 March-April, 1983**

Deamination in *Clostridium sporogenes* and *Clostridium sticklandii* Bacteria — N. P. Golovchenko, B. F. Belokopytov, and V. K. Akimenko . . . 133 181
Determination of Normal Redox Potential of Secondary Quinone Contained in Photosynthetic Reaction Center of *Rhodospirillum rubrum* Chromatophores — V. P. Shinkarev, M. I. Verkhovskii, and B. S. Kaurov . . . . . 138 187
Fractional Lipid Composition during Growth of Microscopic Fungi of the Entomophthoraceae Family — M. N. Bekhtereva, N. I. Popova, L. A. Galanina, and G. V. Tolstikova. . . . . 143 192
Catabolite Repression of Constitutive Synthesis of Pectin Transeliminase in *Penicillium digitatum* — R. V. Mikhailova, A. G. Lobanok, and L. I. Sapunova . . . . . 147 197
Induction of Endo-1,4-β-D-glucanase, Exo-1,4-β-D-glucosidase, and Cellobiase in *Aspergillus terreus* — O. N. Okunev, I. D. Svistova, N. A. Zherebtsov, and E. L. Golovlev . . . . . 151 202
Effects of Iron Ions on the Microbiological Transformation of Quinoline — N. V. Dzumedzei, A. G. Shevchenko, A. A. Turovskii, and I. I. Starovoitov . . . . . 157 209
Electrophysical Properties of *Bacillus thuringiensis* Spores — V. M. Fomchenkov, A. N. Alekseev, V. N. Brezgunov, N. V. Ivanov, and V. V. Shevtsov . . . . . 160 213
Investigation of Lipid-Forming Yeasts Growing on a Medium with Ethanol — V. P. Zhelifonova, N. I. Krylova, É. G. Dedyukhina, and V. K. Eroshin . . . . . 165 219
Nonuniformity of the Uptake of $NH_4^+$ and $NO_3^-$ Ions from the Nutrient Medium by *Candida utilis* Cultured at Various pH Values — S. A. Lirova, L. A. Karmanova, F. A. Belinskaya, and I. L. Rabotnova. . . . . 171 225
Respiration of Colonies of the Fungi *Trichoderma koningii* and *Mucor plumbeus* during Growth on Agarized Media with Glucose — N. S. Panikov, V. D. Afremova, I. V. Aseeva, and V. S. Vshivtsev . . . . . 176 230
Dynamics of Autoregulatory Factors d in Batch Cultures of *Pseudomonas carboxydoflava* and *Bacillus cereus* — G. I. El'-Registan, V. I. Duda, V. A. Svetlichnyi, A. N. Kozlova, and I. A. Tipiseva . . . . . 184 238
Growth of Purple Bacteria Utilizing Acetate under Anaerobic Conditions in Darkness — E. N. Krasil'nikova, R. N. Ivanovskii, and E. N. Kondrat'eva . . . . . 189 244

Kinetics of the Growth of Actinomycetes on Solid Media — K. A. Vinogradova, Z. G. Sokolova, A. L. Stepanov, and L. S. Kozhevina . . . . . 194 249
An Electron-Microscopic Investigation of *Bacillus thuringiensis* during Its Development and Synthesis of Exoprotease — N. S. Egorov, Zh. K. Loriya, and T. G. Yudina . . . . . 199 254
Effect of Dehydration on the Surface Structure of the Yeast Cell Wall — A. I. Rapoport, V. I. Birozova, and M. E. Beker . . . . . 204 259
Localization of Lipase in *Penicillium Cyclopium* Hyphae — — I. S. Zvyagintseva, V. V. Dmitriev, V. A. Melikhovskii, and B. A. Fikhte . . . . . 207 263
Damage to *Escherichia coli* Cells by Hydrostatic Pressure during Freezing — Yu. A. Itkin, V. L. Bronshtein, I. P. Vysekantsev, A. M. Vorotilin, and P. G. Iserovich . . . . . 212 268
Characteristics of *Promicromonospora citrea* Life Cycles — T. F. Kuimova, L. I. Evmushenko, and N. S. Agre . . . . . 215 272
Changes in Cell Ultrastructure in Saprotrophic Mycobacteria Treated with Isoniazid — T. V. Koronelli and T. V. Kalyuzhnaya . . . . . 222 278
Morphology and Ultrastructure of Certain *Actinomadura* Species — L. N. Lavrova, O. N. Kapitonova, T. P. Preobrazhenskaya, and L. N. Kats . . . . . 226 283
Determination of the Taxonomic Status of Psychrophilic Luminescent Bacterial Cultures by Molecular DNA—DNA Hybridization — G. A. Primakova, T. P. Turova, T. I. Vorob'eva, A. M. Fish, and A. S. Antonov . . . . . 233 290
Rearrangements of the Central Metabolism in *Pseudomonas aeruginosa* Adapted to Growth on p-Xylene — O. V. Mal'tseva and L. A. Golovleva. . 237 294
Populational Changes in the *Pseudomonas putida* Strain BSA202 Carrying Plasmid NPL-1 for Naphthalene Catabolism — A. N. Borisoglebskaya and A. M. Boronin . . . . . 243 301
Characteristics of the Mutants and Peculiarities of Genetic Regulation of Methanol Metabolism in *Candida boidinii* — V. I. Titorenko, S. V. Bykovskaya, and Yu. A. Trotsenko . . . . . 249 307
Isolation and General Characteristics of the Temperate Phage SM of *Pseudomonas aeruginosa* — A. S. Gorelyshev, A. M. Kul'ba, and Yu. D. Tsygankov . . . . . 254 312
Chemotactic Reactions in Freshwater Bacterioplankton — B. V. Gromov, K. A. Mamkaeva, and V. D. Bobina . . . . . 260 318
Acceleration of Ferrous Iron Oxidation by a *Thiobacillus ferrooxidans* Culture — S. I. Grishin, É. V. Adamov, V. V. Panin, and G. I. Karavaiko . . . . . 264 322
Thermophilic Methane-Producing Bacteria from *Methanobacillus kuzneceovii* Methylotrophic Associations — T. N. Zhilina, V. I. Chudina, S. A. Ilarionov, and E. A. Bonch-Osmolovskaya . . . . . 268 328

**Volume 52, Number 3 May-June, 1983**

Attraction of Motile *Caulobacter vibrioides* Cells by Amino Acids — M. A. Matveeva and B. V. Gromov..... 275 357
Molecular DNA—DNA Hybridization Applied to *Pseudomonas fluorescens* and *Pseudomonas putida* — E. A. Kiprianova, G. F. Levanova, Yu. P. Shvetsov, and A. D. Garagulya..... 278 360
Special Features of the Central Metabolism in Coryneform Bacteria — Ch. M. Sandanov, N. V. Eroshina, V. Zh. Tsyrenov, and E. L. Golovlev..... 282 365
Microorganisms Breaking Down Certain Nonionogenic Surfactants — V. M. Udod, N. I. Podorvan, G. S. Vengzhen, and P. I. Gvozdyak..... 286 370
New Obligate Halophilic Methane-Producing Bacterium — T. N. Zhilina..... 290 375
Participation of Glutathione in Regulation of Methanol Metabolism in Yeast — V. M. Ubiivovk, L. V. Bystrykh, and Yu. A. Trotsenko..... 297 383
Comparative Study of the Chemical Composition and Certain Properties of Polysaccharides of the Capsules of M-, S-, and R-Variants of *Mycobacterium lacticolum* — E. S. Mil'ko, I. V. Botvinko, R. A. Stepanova, and N. S. Egorov..... 301 388

Population Dynamics of p-Xylene-Assimilating *Pseudomonas aeruginosa* — N. V. Gorlatova and L. A. Golovleva..... 305 392
Plasma-Coagulating and Fibrinolytic Activity of Fungi in the Genus *Aspergillus* —V. V. Klechkovskaya and N. S. Egorov..... 309 396
Colchicine-Induced Synthesis of Pullulan in *Pullularia (Aureobasidium) pullulans* — A. A. Imshenetskii, T. F. Kondrat'eva, and A. N. Smut'ko..... 316 404
Isolation of a Thermotolerant Mutant of *Rhizopus pygmaues* with Higher Glucoamylase Activity — V. S. Grigorov, N. A. Zherebtsov, and V. V. Shchegolev..... 319 408
Synthesis and Secretion of Compounds of Cellulase Complex in *Aspergillus terreus* — I. D. Svistova, A. V. Shul'ga, and O. N. Okunev..... 324 414
Effect of Nutritional and Physiological Conditions on the Production of α-Amylase and Glucoamylase by a Selected Strain of *Aspergillus oryzae* — E. A. Kassim..... 330 422
Influence of Aeration on the Physiological Activity and Lipidogenesis of the Yeast *Rhodotorula glutinis* — M. V. Zalashko, L. V. Romanova, and V. V. Gerbeda..... 335 428
Isolation of Lipoteichoic Acid from *Streptomyces levoris* — N. V. Potekhina, G. M. Streshinskaya, G. V. Novitskaya, and I. B. Naumova..... 340 434
Stability of the Composition of the Fatty Acids of Actinomycetes — I. B. Konova, L. M. Rudakova, and O. I. Pan'kina..... 344 438
Changes in the Content and Fatty Acid Composition of Lipids from Whole Cells and Cell Walls during Cytodifferentiation in *Absidia coerulea* — I. V. Pisarevskaya and E. P. Feofilova..... 349 444
Hybridization of the Asporogenic Strains of *Hansenula polymorpha* by Protoplast Fusion — G. V. Savchenko, Yu. G. Kapul'tsevich, A. V. Temina, and I. A. Nikitina..... 353 449
Identification and Distribution of Sulfur in *Thiobacillus ferrooxidans* Cells — L. A. Gromova, G. I. Karavaiko, A. V. Sevtsov, and N. A. Pereverzev..... 357 455
Dynamics of DNA Synthesis by Cyanophage LPP-3A in *Plectonema boryanum* Cells — N. V. Nesterova, N. V. Tkacheva, T. S. Sagun, and N. N. Mashkovskii..... 364 461
Propionic-Acid Cocci and Their Systematic Position — L. I. Vorob'eva, T. P. Turova, N. I. Kraeva, and M. A. Alekseeva..... 368 465
Ultrastructure, Chromatic Characteristics, and Photosynthetic Activity of *Anacystis nidulans* at Different Stages of Cell Development — K. D. Iptysheva, I. V. Maksimova, and K. A. Nikitina..... 374 472
An Unusual Thermophilic Form of *Mastigocladus laminosus* — V. N. Nikitina and L. M. Gerasimenko..... 379 477
Viability of Various Cultures of Microscopic Fungi from Soddy-Podzolic Soil at Different Sea- and River-Water Temperatures — L. V. Alton..... 383 482
Cell Cycle of Daughter Cells of *Candida utilis* Developing at Different Glucose Concentrations — D. Vrana..... 387 487
Determination of the Denitrifying Activity of Soil Microorganisms Using Acetylene — B. F. Sadykov, L. D. Zueva, and S. M. Poldneva..... 391 490
Characteristics of Thermophilic Bacteria Isolated from Kamchatka Hot Springs — O. A. Andreev, O. V. Rybal'chenko, O. N. Shalaeva, N. P. Isakova, O. K. Kaboev, and N. V. Tomilin..... 396 496
Selection and Biochemical Activity of a Microbial Cenosis in the Process of Purifying Concentrated Effluents — R. P. Naumova, L. P. Usmanova, V. V. Voronenko, and I. M. Giniamullin..... 404 505

**Volume 52, Number 4 July-August, 1983**

Growth of Carboxydobacteria Seliberia carboxydohydrogena as a Function of the Composition of the Gas Mixture — T. G. Volova, G. N. Stasishina, and G. E. Kasaeva..... 411 533

Determination of Taxonomic Relations of Bacteria Belonging to the Genus Ectothiorhodospira – T. L. Ivanova, T. P. Turova, and A. S. Antonov . . . . . 415 538
Effect of $pO_2$ on Growth and Hydrogenase and Nitrogenase Activity of Rhodopseudomonas capsulata and Azotobacter vinelandii Cells – A. A. Tsygankov, A. F. Yakunin, and I. N. Gogotov . . . . . 419 543
Physiological Characteristics of Photosynthesis in the Thermophilic Blue-Green Alga Mastigocladus laminosus – V. K. Nekrasova, L. M. Gerasimenko, and A. K. Romanova . . . . . 423 548
Use of Hydrogen Peroxide as Source of Oxygen Nutrition for Methane-Oxidizing Bacteria – Yu. R. Malashenko, V. I. Karpenko, F. V. Muchnik, and V. A. Romanovskaya . . . . . 428 554
Nature of Sulfur-Containing Component and Its Functions in Thiobacillus ferrooxidans Cells – G. I. Karavaiko, L. A. Gromova, and N. A. Pereverzev . . . . . 433 559
Metabolic Limitation of DNA Polymerase I Synthesis by Escherichia coli CM5199 – S. A. Soktoev and E. L. Golovlev . . . . . 438 563
Effect of Proteins on Exoprotease Synthesis in Bacillus thuringiensis – N. S. Egorov, Zh. K. Loriya, and T. G. Yudina . . . . . 443 569
Localization of Ribonucleases in the Aspergillus clavatus Mycelium – G. S. Ivanova and S. B. Petrikevich . . . . . 446 573
Selection and Breeding of a Urease-Producing Strain of Staphylococcus saprophyticus – D. Yu. Yuodval'kite, A. A. Glemzha, and I. Yu. Gal'vidis . . . . . 451 579
1,3-$\beta$-Glucanases of Actinomycetes – N. A. Tiunova, N. Ya. Kobzeva, I. V. Zaikina, L. A. Elyakova, and N. I. Nazarova . . . . . 457 586
Correlation between DNA Synthesis and Vitamin $B_{12}$ Content in Propionibacterium shermanii Cells – E. P. Iordon, T. Yu. Novozhilova, and L. I. Vorob'eva . . . . . 461 591
Composition of the Cell Walls of Streptomyces roseoflavus var. roseofungini and Its Nocardia-Like Variant – N. K. Skoblilova, O. D. Zakharova, S. O. Suetin, I. B. Naumova, and N. S. Agre . . . . . 467 597
Thermophilic, Cellulose-Decomposing Myceliophthora thermophila – L. G. Loginova, L. A. Belyakova, É. P. Guzhova, I. Kh. Yusupova, L. G. Burdenko, and L. M. Seregina . . . . . 473 605
Bacteria That Decompose $\alpha$-Methylstyrene – A. N. Ilyaletdinov, R. M. Alieva, and D. B. Dzhusupova . . . . . 477 609
Effect of "Sulfochlorantine" on Escherichia coli Cell-Free Systems – L. S. Viktorova and N. M. Verbina . . . . . 482 615
Effect of Periodic Freezing and Thawing on Cells of the Antarctic Black Yeast Nadsoniella nigra var. hesuelica – S. P. Lyakh, T. M. Kozlova, and S. M. Salivonik . . . . . 486 620
Electron-Microscopic Study of Lysis in Bacillus stearothermophilus during Submerged Cultivation – A. A. Imshenetskii, N. F. Kirillova, and T. F. Kuimova . . . . . 491 625
Electron-Microscopic Study of L-Like Colonies of the Cyanobacterium Chlorogloea fritschii – M. V. Gusev, O. I. Baulina, L. R. Semenova, L. A. Mineeva, and L. N. Kats . . . . . 495 629
Sensitivity of Escherichia coli Phages to Certain Physicochemical Factors Accompanying the Cryconservation Process – A. A. Tsutsaeva, I. P. Vysekantsev, V. L. Bronstein, and P. G. Iserovich . . . . . 500 634
Effect of Principal Biogenic Elements on the Amylolytic Microbe Association of a Leached Chernozem – A. V. Kurakov, V. S. Guzev, and T. G. Mirchink . . . . 504 638
Population Dynamics of Rhizobium japonicum in the Rhizoplane and Rhizosphere of Different Plants – G. A. Lisichkina, P. A. Kozhevin, and D. G. Zvyagintsev . . . . . 511 646
Simple Method for Assessing the Competitive Ability of Nodule Bacteria – O. A. Berestetskii, A. T. Novikova, and V. L. Knyazeva . . . . . 515 651
Estimation of the Productivity of Symbiotic Nitrogen Fixation by the Acetylene Method – B. F. Sadykov, L. D. Zueva, and M. Yu. Sadykova . . . . . 521 658
A Synthetic Medium for Culturing Bacillus thuringiensis – L. E. Kuznetsov, M. P. Khovrychev, and Z. V. Sakharova . . . . . 526 663

Volume 52, Number 5 September-October, 1983

Effect of Amino Acids and Proteins on Bacitracin and Exoprotease Synthesis by *Bacillus licheniformis* – N. S. Egorov, S. N. Bybornykh, Zh. K. Loriya, and E. V. Parygin . . . . . 531 693

Use of Fluorescent Analysis for the Study of Lipid Synthesis by Mycelial Fungi — N. A. Pomoshchnikova, S. A. Korotkov, and L. A. Galanina . . . . . 536 698
Characteristic Tables for Biosynthesis of Microbial Monomers — G. I. Skurida, V. A. Mironov, and L. N. Drozdov-Tikhomirov . 540 702
*Blastobacter aminooxidans*, a New Species of Bacteria Growing Autotrophically on Methylated Amines — N. V. Doronina, N. I. Govorukhina, and Yu. A. Trotsenko. . . . . 547 709
Effect of Temperature and Aeration on Growth and Spore Formation in *Bacillus thuringiensis* — Yu. N. Ignatenko, Z. V. Sakharova, M. P. Khovrychev, and V. V. Shevtsov. . . . . 553 716
Effect of Sucrose and Lactose on Resistance of the Yeast *Saccharomyces cerevisiae* to Dehydration — A. I. Rapoport and M. E. Beker. . . . . 556 719
Biosynthesis of β-Glucanases and Chitinase in a Culture of a Mycophilic Strain of *Trichoderma viride* — N. A. Tiunova, N. M. Zhloba, and I. I. Sidorova . . . . . 560 723
Induction of Catechol Dioxygenases in *Rhodococcus corallinus* — I. N. Dugan and E. L. Golovlev . . . . . 565 729
*Rhodococcus erythropolis*, an Organism Producing Exocellular α-Mannanase — I. N. Pavlova, I. Ya. Zakharova, and N. Z. Tin'yanova . . . . . 570 735
Coordinated Regulation of the Activity of Enzymes of Glucose Transport and Metabolism in *Brevibacterium flavum* — M. P. Ruklish, L. Ya. Labane, U. É. Viestur, Yu. É. Shvinka, I. A. Shmite, and A. A. Latsar . . . . . 574 739
Activity of Components of the Isozyme Spectra of Enzymes from *Saccharomyces cerevisiae*, *Saccharomyces carlsbergensis*, and Their Hybrids — V. S. Orlova and N. M. Semikhatova . . . . 579 744
Isolation and Study of the Biological Properties of a Factor Stimulating Protease Biosynthesis in an Associative Fungal Culture — L. I. Buyak, N. S. Landau, M. P. Kolesnikov, and N. S. Egorov . . . . . 584 750
Selection of Cultures of Microscopic Fungi Synthesizing Phosphomonoesterase Inhibitors — I.-M. V. Gorbacheva, K. M. Kebekbaeva, and A. M. Bezborodov. . . . . 588 755
Transformation of Desthiobiotin into Biotin by the Fungus *Rhizopus delemar* — E. S. Naumova and L. I. Vorob'eva. . . . . 593 761
Chemical Composition and Role of Peptidoglycolipid of *Pseudomonas aeruginosa* in the Assimilation of Hydrocarbons — T. V. Koronelli, T. I. Komarova, and Yu. V. Denisov . . . . 599 767
Degradation of 3-Chlorobenzoic Acid by a *Pseudomonas putida* Strain — V. G. Grishchenkov, I. E. Fedechkina, B. P. Baskunov, L. A. Anisimova, A. M. Boronin, and L. A. Golovleva . . . . . 602 771
A New Species of Exoparasitic Bacteria from the Genus *Micavibrio* Destroying Gram-Negative Bacteria — V. A. Lambina, A. V. Afinogenova, S. Romay Penabad, S. M. Konovalova, and L. V. Andreev . . . . . 607 777
*Calderobacterium hydrogenophilum* gen. et sp. nov., an Extremely Thermophilic Hydrogen Bacterium and Its Hydrogenase Activity — V. R. Kryukov, N. D. Savel'eva, and M. A. Pusheva . . . . . 611 781
Spore-Forming, Sulfate-Reducing Bacterium *Desulfotomaculum guttoidewn* sp. nov. — G. I. Gogotova and M. B. Vainshtein . . 618 789
Use of Molybdenum Media with Glycerol and Admixtures of Nonassimilated Polyols for Differentiation of Actinomycetes — L. I. Potekhina. . . . . 622 794
Comparative Serological Analysis of Methanotrophic Bacteria — L. V. Bezrukova, Yu. I. Nikolenko, A. I. Nesterov, V. F. Gal'chenko, and M. V. Ivanov. . . . . 626 800
Conditions and Characteristics of Early Stages of Sexual Interaction of Cells of the Yeasts *Pichia amethionina* var. *amethionina* and *Pichia amethionina* var. *pachycereana* — A. V. Vorob'ev. . . . . 632 806
Growth Characteristics of Haploid and Diploid Strains of the Yeast *Hansenula polymorpha* on Methanol under Continuous-Culture Conditions — S. N. Parshina, K. M. Bliznik, Yu. G. Kapul'tsevich, and V. É. Sterkin . . . . . 637 812

A Comparative Study of Pullulans Synthesized by Strains of *Pullularia (Aureobasidium) pullulans* of Differing Levels of Ploidy — A. A. Imshenetskii, T. F. Kondrat'eva, L. I. Kudryashev, S. M. Yarovaya, A. N. Smut'ko, and G. S. Alekseeva . . . . . 640 816

Characteristics of Defective Lysogeny in *Streptomyces chrysomallus* — Ya. I. Rautenshtein, N. Ya. Solov'eva, L. N. Moskalenko, and T. F. Kuimova . . . . . 645 821

Ultrastructure of *Candida utilis* Yeasts in Continuous Culture with Various Concentrations of Carbon Source and Different Feeding Methods — S. B. Petrikevich, L. A. Litvinenko, M. É. Kintana, and E. I. Popov. . . . . 649 826

Ultrastructural Localization of Calcium in Purple Sulfur Bacteria — V. V. Petrunyaka and B. G. Vasil'ev. . . . . 655 831

Ascospore Formation in Yeasts Assigned to *Torulopsis candida* — B. M. Blagodatskaya . . . . . 658 834

Sensitivity of Microorganisms Isolated from Soil to Zinc and Lead — G. A. Niyazova, S. V. Letunova, and E. A. Volodina. . . . . 663 839

Comparative Evaluation of the Nitrogen-Fixing Activity of an Azotobacter Using the Acetylene Method and on the Basis of Total Nitrogen — V. G. Nikogosyan. . . . . 671 848

Characteristics of the Bacterial Breakdown of Primarily Oxidized Manganese Ores from the Nikopol' Deposit — Yu. S. Babenko, L. M. Dolgikh, and M. Z. Serebryanaya. . . . . 674 851

Volume 52, Number 6 November-December, 1983

Glucose Metabolism in the Bacteria Clostridium sporogenes and Clostridium sticklandii — N. P. Golovchenko, B. F. Belokopytov, and V. K. Akimenko . . . . . 681 869

Utilization of Different Sulfur Sources by Propionic Bacteria — L. I. Vorob'eva and I. A. Charakhch'yan . . . . . 686 875

Correlations in the Utilization of Carbon Sources in Species of the Griseus Series of the Streptomyces Genus — L. I. Potekhina . . . . . 691 880

Some Conditions for Biosynthesis of Extracellular Heteroglycan by Mycobacterium salivarium — I. V. Botvinko, N. N. Grechushkina, and N. S. Egorov . . . . . 696 886

Investigation of Nucleotide Sequences in the DNA of Hydrogen Bacteria — A. M. Lysenko, N. D. Savel'eva, and S. K. Artyushin . . . . . 699 890

Photosynthesis and Hydrogen Metabolism in Anabaena azollae — Chan-van-Ni, Chan-Hai, and I. N. Gogotov. . . . . 704 896

Resistance of Microorganisms from the Mesosphere to Periodic Freezing and Thawing — A. A. Imshenetskii, S. V. Lysenko, T. M. Kozlova, and A. T. Novichkova . . . . . 709 902

Effect of Cyclical Changes in Culturing Conditions on the Growth Kinetics and Physiological Characteristics of Yeasts — D. P. Sokolov, S. A. Lirova, and E. A. Sokolova. . . . . 715 909

Effects of Copper on the Composition of Denitrification Products in Hyphomicrobium — I. Ya. Vedenina and A. V. Lebedinskii. . . . . 722 917

Chemical Composition and Morphological Changes in Cells in a Candida utilis Chemostat Culture Inhibited by Zinc Ions — E. A. Andreeva, A. I. Biryuk, M. P. Khovrychev, and I. L. Rabotnova . . . . . 728 924

Growth Kinetics of Microorganisms of the Genus Pseudomonas on a Molasses Post-Alcoholic Mash — A. A. Arzamastsev, V. I. Bodrov, and N. S. Popov. . . . . 732 929

Formation of Lipids and Protein during Growth of Cunninghamella japonica — M. V. Mikhailova, E. P. Feofilova, É. G. Rozantsev, and E. A. Shirokova . . . . . 738 935

Repression of Exoprotease Synthesis in Bacillus licheniformis — N. S. Egorov, S. N. Vybornykh, Zh. K. Loriya, and Z. Fishinger . . . . . 743 941

1,3-β-Glucanases of Soil Fungi and the Conditions of Their Biosynthesis — I. V. Zaikina, N. A. Tiunova, and A. M. Bezborodov. . . . . 746 945

Induction of Dioxygenases of Aromatic Substrates in Rhodococci with Limitation of the Nutrients — I. N. Dugan and E. L. Golovlev. . . . . 751 951

Monochlorophenols as Substrates of the Enzymes of Preparatory Phenol Metabolism in the Yeast Candida tropicalis — V. S. Ivoilov and Yu. N. Karasevich . . . . . 755 956

Production of an Endonuclease-Superproducing Mutant of Serratia marcescens by Nitrosomethylurea Treatment of a Synchronized Culture — Z. I. Panfilova and R. I. Salganik . . . . . 770 974
Selection of Mutants Synthesizing Branched-Chain Amino Acids in the Methylotrophic Yeast Hansenula polymorpha — V. I. Titorenko and Yu. A. Trotsenko. . . 774 979
Isolation of Cryptic Plasmids in Rhizobium meliloti — V. V. Kuchko, A. N. Zaretskaya, V. I. Golubkov, I. G. Fokina, and B. V. Simarov . . . . . 780 986
Effect of Exogenous RNA on the Expression of the β-Galactosidase Gene in Yeast Protoplasts — V. S. Kirillova, L. I. Likhacheva, Yu. I. Gorlov, L. G. Zharova, and V. A. Kordyum . . . . . 784 991
Changes in the Cell Surface of Yeasts Metschnikowia pulcherrima and Citeromyces matritensis during Conjugation — A. V. Vorob'ev and V. M. Blagodatskaya . . . . . 788 996
Changes in Numbers of Soil Bacteria in Relation to the Hydrothermal Soil Regime — D. G. Zvyagintsev and V. E. Golimbet. . . . . 790 999
Effect of Oil Pollution on the Nitrogen Cycle in Soil — N. M. Ismailov. . . . . 794 1003
Decomposition of Cellulose in the Ivankovo and Uglich Water Reservoirs — T. M. Timakova . . . . . 798 1008
Extinction of Luminescence in Luminescent Bacteria as a Test for Evaluating Toxicity of Phenol Components of Effluents — T. A. Gil', A. E. Balayan, and D. I. Stom . . . . . 803 1014
